

SolarShield®

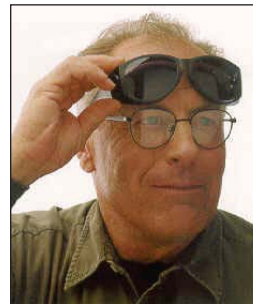

# Post-Cataract Surgery Sunglasses

Designed to be worn over prescription spectacles

## Post-operative eye protection for cataract patients

After cataract procedure your eyes will be very sensitive to light - even normal daylight on a cloudy day. This condition is only temporary, but exposure to bright light is likely to be uncomfortable. Normal sunglasses are often unable to cope with the demands of this situation but SolarShield® have developed a range of eyewear which filters out harmful UVA and UVB rays and as much as 48% more normal light than regular sunglasses. These spectacles are ideal for the post operative cataract patient - and they function superbly as normal sunglasses for continuing use.

ONE SIZE  
FITS ALL
